# PetroBot MagRover

In-Service Tank Shell/Roof Inspection Tool

MagRover is a magnetic inspection tool that can perform non-destructive testing of tank shells & roof plates without manual intervention. Our solution can take UT spot thickness as well as UT scanning. Our designed solution can bear up to 8 UT probes at once, making our solution far accurate and fast than others. MagRover can be used in any hazardous condition as all electronic devices are either placed in an ATEX box or are flameproof.

ATEX Compliant & Intrinsically Safe

DC

Operates on DC Voltage
